Our commitment to Research Culture

“We envisage a research culture in the European Research Area where a) **all participants** in the research endeavour are **appropriately recognised** for their **diverse contributions**, b) the **broad skills and competencies** of researchers are fostered and supported by **suitable training, appropriate infrastructure**, and **responsible management and governance**, c) **research integrity** and **high ethical standards** are promoted effectively, and d) careers in research are **attractive and sustainable**.”

Science Europe Statement (Nov 2021)

DOI: [10.5281/zenodo.5726893](https://doi.org/10.5281/zenodo.5726893)

Shared values

The research
process, activities,
outputs and
outcomes

OPENNESS AND
TRANSPARENCY

AUTONOMY/
FREEDOM

CARE AND
COLLEGIALITY

Research
management and
governance

INTEGRITY
AND ETHICS

COLLABORATION

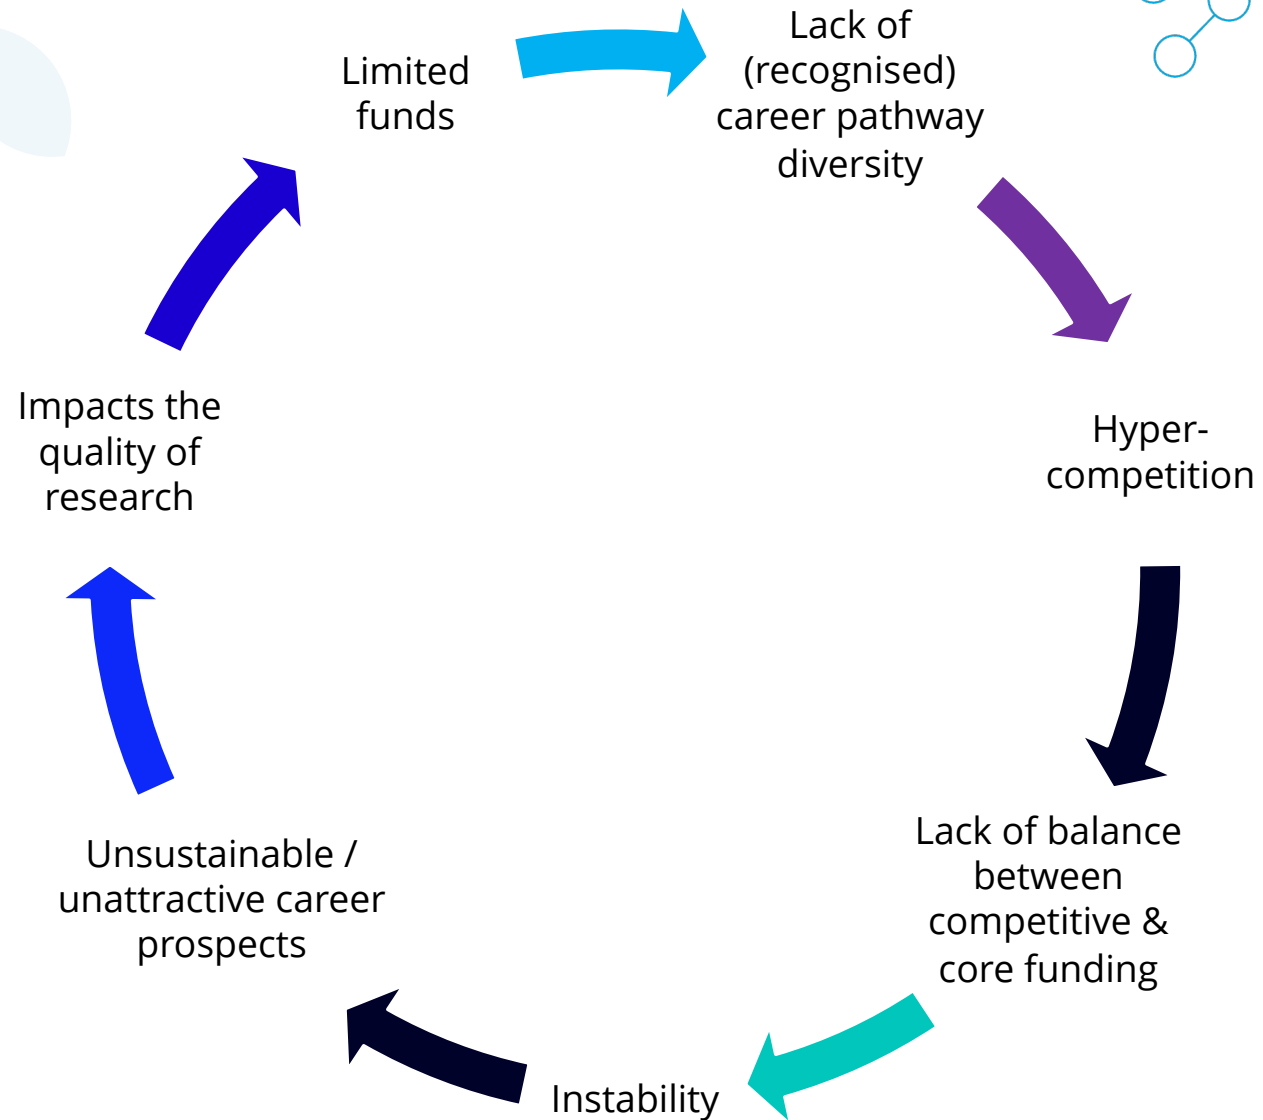

EQUALITY,
DIVERSITY AND
INCLUSION

Current issues

- Limited funding at a systems levels
- Hyper-competition for grants and positions
- Inappropriate selection criteria
- Too much focus on research careers not careers in research
- 'Projectification' of research
- Lack of long-term perspective on 'quality'

Current issues

Current issues

Prof. Ulrike Felt (2021):

“Projectification: the temporal packaging of knowledge production and the implementation of accountability procedures. It is now common to consider research as a collection of milestones, work packages, and roadmaps, and this is the result of project-thinking. This has led to a disproportionate growth in early-career positions without the equivalent growth at more senior permanent levels. In turn, this leads to temporary work on a project-time basis.”

Science Europe High Level Workshop Report (Dec 2021)

DOI: [10.5281/zenodo.5788458](https://doi.org/10.5281/zenodo.5788458)

Opportunities

- **Consider the balance between grant funding and core funding – objective-oriented**
- **Manage competition – value more diverse career paths**
- **Reform research assessment processes and criteria with careers in research at the centre**
- **Recognise (and fund) all who contribute to the research endeavour, and all types of contributions (teamwork, leadership, mentorship etc.)**
- **Use research projects appropriately, be flexible to accommodate research needs and individual needs.**
- **Consider quality and impact at a multi-cohort level – in line with our values.**

Value-based changes:
